Data Scientist and Analytics Engineer with over 2 years of experience designing scalable data workflows, automating enterprise systems, and translating complex datasets into actionable business value. Proven track record of building predictive ML models, maintaining secure databases, and enforcing strict data governance (DPDP Act 2023) across Healthcare Tech, Manufacturing, and Digital Marketing sectors. Passionate about leveraging data storytelling and automated pipelines to optimize resource allocation, reduce operational costs, and empower stakeholders to make probability-backed decisions.

TECHNICAL SKILLS

- **Languages & Databases:** Python (Pandas, NumPy, Scikit-Learn, PyTorch), SQL, NoSQL (MongoDB), Google Apps Script.
- **BI & Visualization:** Power BI, DAX, Streamlit, Plotly Dash, Tableau, Excel.
- **Analytics & ML:** Time-Series Forecasting (Prophet, ARMA/ARIMA), A/B Testing, Computer Vision (CNNs), Exploratory Data Analysis (EDA), Statistical Modeling.
- **Engineering & Automation:** Data Engineering, ETL Pipelines, AppSheet No-Code Development, Database Administration, DPDP Compliance, Hardware Deployment

EXPERIENCE

Automation Specialist & Data Systems Engineer – Project Based Development Consortium | Bahraich, Uttar Pradesh, India

May 2026 – Present

Project: Project on Breastfeeding and New born Care (PBNC)

- **System Development & Automation:** Engineered and deployed new tools for patient and program management; automated complex data processing pipelines and phone call systems using Google Apps Script and AppSheet.
- **Database Integrity & Security:** Maintained and secured the primary patient management database, rapidly resolving operational bugs, executing code migrations, and engineering code safeguards to eliminate downtime.
- **Data Governance:** Championed and enforced Digital Personal Data Protection (DPDP Act 2023) practices across all software tools and healthcare data pipelines.
- **IT Infrastructure:** Managed hardware deployments (computers, tablets, mobile devices) and conducted comprehensive technical onboarding and training for medical staff.

Data Analyst – Project Based

May 2024 – April 2026

Bhagwati Udyog | Greater Noida, Uttar Pradesh, India

Project: Raw Material & Inventory Management Dashboard

- **Raw Material & Inventory Dashboard:** Engineered a centralized Power BI dashboard to monitor daily consumption and real-time stock levels, successfully reducing overall inventory carrying costs by 18%.
- **Predictive Demand Forecasting:** Built a predictive time-series model using Python (Prophet/ARMA) to forecast seasonal demand, optimizing raw material procurement and reducing component stockouts by 12%.
- **Workflow Automation:** Automated data ingestion pipelines using Python (Pandas) and SQL to clean inventory logs, eliminating 12 hours of manual entry per week and improving accuracy to 99%.

Analyst – Internship

Jul 2023 – Dec 2023

Wunderman Thompson Studios | Gurgaon, India

Project: Campaign Analytics & ROI Optimization

- **Analyz Campaign ROI Optimization:** Analyzed digital marketing performance by integrating data from Salesforce and Marketo, uncovering engagement trends that boosted overall campaign ROI by 18%.
- **A/B Testing & Conversion:** Orchestrated rigorous A/B testing protocols and performed Exploratory Data Analysis (EDA), successfully validating strategies that increased lead conversion rates by 22%.
- **Performance Visualization:** Built interactive Power BI dashboards to visualize core metrics, cutting reporting turnaround time by 30% and empowering stakeholders with fast, data-driven insights.

EDUCATION

Diploma in Applied Artificial Intelligence Lab WorldQuant University, U.S	Sept 2025 – Dec 2025
Diploma in Applied Data Science Lab WorldQuant University, U.S	Mar 2025 – Jun 2025
Master of Computer Applications (MCA) Vivekananda Institute of Professional Studies (VIPS), Delhi CGPA: 9.5/10	May 2021 - July 2023
Bachelor of Computer Applications (BCA) , Trinity Institute of Professional Studies (TIPS), Delhi CGPA: 8.7/10	Aug 2018 - July 2021

INDEPENDENT PROJECT

Personal Finance Dashboard Power BI, SQL, Data Modeling	Aug 2024 – Oct 2024
- Engineered an end-to-end ETL pipeline using Python (Pandas) and SQL Server to ingest, cleanse, and normalize messy bank statements into a structured Data Warehouse. - Automated transaction categorization, significantly reducing manual data processing by 90%. - Delivered a unified view of spending patterns through an interactive dashboard that empowered users to optimize budget allocations and track financial health.	
Environmental Forecasting (Delhi AQI) Python, Time-Series Analysis, EDA	Dec 2024 – Jan 2025
- Tackled a complex environmental issue by analyzing years of historical Air Quality Index (AQI) data for Delhi to uncover deep-rooted seasonal pollution patterns. - Built and validated a predictive time-series model (Prophet/ARIMA) to accurately forecast future pollution spikes based on historical trends and cyclical environmental factors. - Visualized high-dimensional environmental predictions into accessible graphs, demonstrating the ability to use data storytelling for strategic planning..	
Real Estate Price Prediction Model (Gurugram) Python, Regression Analysis	Jan 2025 – Feb 2025
- Built a predictive pricing algorithm for the highly volatile Gurugram real estate market by analyzing historical property data, location features, and market trends. - Developed an accurate regression model capable of estimating fair property valuations, providing actionable insights for potential real estate investments.	
AI-Driven Healthcare Diagnostic Tool Python, Random Forest, Logistic Regression	Mar 2025 - Apr 2025
- Designed a predictive machine learning model using detailed patient health metrics to identify early risk factors for strokes. - Evaluated multiple algorithms (Random Forest, Logistic Regression) to optimize diagnostic accuracy and minimize false negatives in a critical healthcare context. - Highlighted the most critical health indicators driving stroke risk, translating complex medical data into interpretable technical insights.	
Financial Risk & Fraud Detection Engine Python, Scikit-Learn, SMOT	Sep 2025 - Nov 2025
- Built a machine learning classification model to detect fraudulent credit card transactions within highly imbalanced financial datasets. - Applied SMOTE (Synthetic Minority Over-sampling Technique) to balance the data, significantly improving the model's ability to catch rare anomalies.	

ACHIEVEMENTS AND CERTIFICATES

- SQL (Intermediate) Certificate** | HackerRank (Feb 2026)
- Data Analyst Certification** | OneRoadmap (Jun 2025)
- AI and Data Scientist Certification** | OneRoadmap (Jul 2025)
- Data Processing and Visualisation** | Ministry of Electronics and Information Technology (Aug 2024)
- The Complete Python Bootcamp** | Udemy (Apr 2024)
- Introduction to Database Systems** | NPTEL (Apr 2023)
- Cloud Computing Fundamentals** | NPTEL (Apr 2023)
- Conference Contributor** | International Conference on Sustainable Development (Jul 2023)
