Data Analyst with 2 years of experience designing scalable data workflows and translating complex datasets into actionable business value. Proficient in Python, SQL, and Power BI , with advanced expertise in Statistical Analysis, A/B Testing, and Time-Series Forecasting. Adept at automating ETL pipelines and leveraging data storytelling to optimize ROI and align technical metrics with strategic stakeholder goals.

TECHNICAL SKILLS

- **Programming & Databases:** Python, SQL, NoSQL (MongoDB)
- **Data Visualization & BI:** Power BI, DAX, Power Query, Streamlit, Plotly Dash
- **Data Manipulation & Libraries:** Pandas, NumPy, Scikit-Learn, Statsmodels
- **Statistical Analysis:** A/B Testing, Time-Series Forecasting (ARMA/Prophet), Principal Component Analysis (PCA), Customer Segmentation

EXPERIENCE

Data Analyst – Project Based

May 2024 – Present

Bhagwati Udyog | Greater Noida, Uttar Pradesh, India

Project: Raw Material & Inventory Management Dashboard

- Engineered a centralized Power BI dashboard to monitor daily consumption rates and real-time stock levels for critical raw materials replacing fragmented warehouse spread sheets.
- Automated data ingestion pipelines using Python (Pandas) and SQL to clean and integrate daily inventory logs, eliminating 12 hours of manual data entry per week and improving stock record accuracy to 99%.
- Analyzed historical usage trends to establish dynamic reorder thresholds, successfully identifying stagnant stock and reducing overall inventory carrying costs by 18% without disrupting the assembly line.

Project: Predictive Demand Forecasting

- Built a predictive time-series model using Python (Prophet and ARMA) to accurately forecast seasonal demand for specific washing machine components.
- Analyzed historical production datasets to uncover hidden demand patterns, allowing the procurement team to align their raw material orders with upcoming manufacturing spikes.
- Optimized raw material inventory levels and prevented costly supply shortages, resulting in a 12% reduction in component stockouts during peak seasons.

Analyst – Internship

Jul 2023 – Dec 2023

Wunderman Thompson Studios | Gurgaon, India

Project: Campaign Analytics & ROI Optimization

- Analyzed digital marketing performance by integrating data from Salesforce and Marketo, uncovering customer engagement trends that boosted overall campaign ROI by 18%.
- Orchestrated rigorous A/B testing protocols on marketing assets and performed Exploratory Data Analysis (EDA), successfully validating strategies that increased lead conversion rates by 22%.
- Built interactive Power BI dashboards to visualize core metrics including impressions, conversions, and bounce rates, cutting reporting turnaround time by 30% and empowering stakeholders with fast, data-driven insights.

EDUCATION

Diploma in Applied Artificial Intelligence Lab | WorldQuant University, U.S

Sept 2025 – Dec 2025

Diploma in Applied Data Science Lab | WorldQuant University, U.S

Mar 2025 – Jun 2025

Master of Computer Applications (MCA) | Vivekananda Institute of Professional Studies (VIPS), Delhi | CGPA: 9.5/10

May 2021 - July 2023

Bachelor of Computer Applications (BCA), Trinity Institute of Professional Studies (TIPS), Delhi | CGPA: 8.7/10

Aug 2018 - July 2021

INDEPENDENT PROJECT

Personal Finance Dashboard | Power BI, SQL, Data Modeling

Aug 2024 – Oct 2024

- Engineered an end-to-end ETL pipeline using Python (Pandas) and SQL Server to ingest, cleanse, and normalize messy bank statements into a structured Data Warehouse.
- Automated transaction categorization, significantly reducing manual data processing by 90%.
- Delivered a unified view of spending patterns through an interactive dashboard that empowered users to optimize budget allocations and track financial health.

Environmental Forecasting (Delhi AQI) | Python, Time-Series Analysis, EDA

Dec 2024 – Jan 2025

- Tackled a complex environmental issue by analyzing years of historical Air Quality Index (AQI) data for Delhi to uncover deep-rooted seasonal pollution patterns.
- Built and validated a predictive time-series model (Prophet/ARIMA) to accurately forecast future pollution spikes based on historical trends and cyclical environmental factors.
- Visualized high-dimensional environmental predictions into accessible graphs, demonstrating the ability to use data storytelling for strategic planning..

Real Estate Price Prediction Model (Gurugram) | Python, Regression Analysis

Jan 2025 – Feb 2025

- Built a predictive pricing algorithm for the highly volatile Gurugram real estate market by analyzing historical property data, location features, and market trends.
- Conducted extensive feature engineering to identify the most significant variables driving property value
- Developed an accurate regression model capable of estimating fair property valuations, providing actionable insights for potential real estate investments.

AI-Driven Healthcare Diagnostic Tool | Python, Random Forest, Logistic Regression

Mar 2025 - Apr 2025

- Designed a predictive machine learning model using detailed patient health metrics to identify early risk factors for strokes.
- Evaluated multiple algorithms (Random Forest, Logistic Regression) to optimize diagnostic accuracy and minimize false negatives in a critical healthcare context.
- Highlighted the most critical health indicators driving stroke risk, translating complex medical data into interpretable technical insights.

Financial Risk & Fraud Detection Engine | Python, Scikit-Learn, SMOT

Sep 2025 - Nov 2025

- Built a machine learning classification model to detect fraudulent credit card transactions within highly imbalanced financial datasets.
- Applied SMOTE (Synthetic Minority Over-sampling Technique) to balance the data, significantly improving the model's ability to catch rare anomalies.
- Minimized false positive rates, ensuring legitimate customer transactions were not blocked while maintaining strict security alerts for high-risk activity.

ACHIEVEMENTS AND CERTIFICATES

- **SQL (Intermediate) Certificate** | HackerRank (Feb 2026)
- **Data Analyst Certification** | OneRoadmap (Jun 2025)
- **AI and Data Scientist Certification** | OneRoadmap (Jul 2025)
- **Data Processing and Visualisation** | Ministry of Electronics and Information Technology (Aug 2024)
- **The Complete Python Bootcamp** | Udemy (Apr 2024)
- **Introduction to Database Systems** | NPTEL (Apr 2023)
- **Cloud Computing Fundamentals** | NPTEL (Apr 2023)
- **Conference Contributor (Machine Learning)** | International Conference on Sustainable Development (Jul 2023)
