Email: bajajrisheek012@gmail.com

Professional Summary

Forward-thinking Data Analyst with 2 years of experience engineering scalable data workflows and translating complex datasets into actionable business value. Specializes in Statistical Analysis, Exploratory Data Analysis (EDA), and Time-Series Forecasting. Adept at leveraging data storytelling to optimize resource allocation and guide risk management strategies at organizations like Kritko and Wunderman Thompson. Committed to driving data-informed decisions and strategic innovation.

Technical Skills

Programming & Databases: Python, SQL, NoSQL (MongoDB).

Data Visualization & BI: Streamlit, Plotly Dash, Data Storytelling.

Data Manipulation & Libraries: Pandas, NumPy, Scikit-Learn, Statsmodels.

Statistical Analysis: A/B Testing, Time-Series Forecasting (ARMA/Prophet), PCA, Customer Segmentation

Tools & Deployment: Git, Docker, ETL Pipelines.

Work Experience

Data Analyst | Kritko April 2024 – Nov 2025 | Remote

- **Dashboarding & Reporting:** Designed enterprise-grade Power BI dashboards to monitor organizational KPIs, slashing manual reporting latency by 40%.
- **Data Automation:** Engineered Python-based data validation pipelines, proactively identifying anomalies to maintain 99.9% data accuracy across client deliverables.
- **Stakeholder Management:** Led cross-functional data workshops, translating ambiguous requirements into precise reporting frameworks that aligned with business goals.

Analyst | Wunderman Thompson Studios July 2023 – Dec 2023 | Gurgaon

- **ROI Optimization:** Analyzed marketing campaign performance via Salesforce and Power BI, uncovering insights that boosted engagement rates by 15%.
- **A/B Testing:** Orchestrated rigorous testing protocols on campaign assets, statistically validating strategies that maximized conversion efficiency.
- **Customer Segmentation:** Executed advanced segmentation strategies, identifying "High-Potential" cohorts to fuel personalized retention campaigns.

Certification

- **Data Processing & Visualization (Power BI) | NASSCOM**
 - Mastered end-to-end BI architecture, using Advanced DAX and Power Query to design automated, user-centric dashboards that drive strategic decision-making.
- **Introduction to Database Systems | NPTEL**
 - Specialized in RDBMS schema normalization (3NF) and writing optimized SQL queries for high-performance data retrieval and integrity.
- **Cloud Computing Fundamentals | NPTEL**
 - Gained foundational knowledge of cloud scalability and storage infrastructure (AWS/Azure concepts) essential for modern, cloud-native analytics.
- **HackerRank Intermediate Certificate | HackerRank**
 - Validated advanced problem-solving capabilities, demonstrating proficiency in writing optimized code and efficient queries for complex data manipulation challenges.

Education

Diploma in Applied Data Science Lab | Mar 2025 - Jun 2025

Worldquant University

- **Statistical Modeling:** Mastered Time-Series analysis using ARMA/GARCH models and conducted rigorous A/B Testing (Chi-square) to validate business hypotheses.
- **Data Engineering:** Engineered end-to-end ETL pipelines to wrangle unstructured data from SQL, NoSQL (MongoDB), and Web APIs into clean analytical datasets.
- **Visualization:** Developed PCA-powered visualizations and interactive Plotly Dash interfaces to communicate complex high-dimensional data insights to stakeholders.

Diploma in AI Lab | Aug 2025 - Dec 2025

Worldquant University

- **Generative AI Focus:** Specialized in implementing Generative Adversarial Networks (GANs) and Stable Diffusion pipelines for synthetic data generation (e.g., medical image synthesis).
- **Computer Vision Architecture:** Designed and trained custom Convolutional Neural Networks (CNNs) and utilized Transfer Learning (ResNet/YOLO) for real-world object detection challenges (e.g., traffic analysis).
- **Deployment:** Built and deployed interactive AI applications using PyTorch, Streamlit, and Flask, bridging the gap between theoretical models and user-facing products

Master of Computer Application (MCA) | Aug 2021 - Sep 2023

Vivekananda Institute of Professional Studies, GGSIPU | CGPA: **9.5/10**

- **Core Specialization:** Focused on Algorithm Design, Advanced Machine Learning, and Big Data Technologies, translating theoretical concepts into scalable software solutions.
- **Research & Leadership:** Led multiple capstone research projects and coordinated institutional analytics for NAAC/NBA accreditation, demonstrating a blend of technical research capability and project leadership

Bachelors's in Computer Application (BCA) | Aug 2018 - Sep 2021

Trinity Institute of Professional Studies, GGSIPU | CGPA: **8.7/10**

- **Technical Foundation:** Established a robust bedrock in Object-Oriented Programming, Relational Database Management (DBMS), and Discrete Mathematics.
- **Applied Logic:** honed statistical analysis and logic-building skills through simulation projects, laying the groundwork for advanced data science

Projects

1. Retail Supply Chain & Revenue Command Center

- **Tools:** Power BI, DAX, Power Query, SQL
- **Action:** Designed a centralized Power BI dashboard utilizing complex DAX measures and Row-Level Security (RLS) to track MoM variance and SKU performance, resolving fragmented regional data.
- **Impact:** Uncovered a hidden 15% revenue opportunity in underperforming categories and reduced inventory stockouts by 10% through improved demand visibility.

2. Intelligent HR Workflow Automation Engine

- **Tools:** Python, Streamlit, Large Language Models(LLMs), GenAI Integration
- **Action:** Architected a Python-based automation suite to parse and extract unstructured resume data, scoring candidates against job descriptions with 95% accuracy via an interactive Streamlit interface.
- **Impact:** Slashed administrative screening time by 40%, eliminating a 2-week bottleneck in candidate engagement.

3. Consumer Financial Intelligence Pipeline

- **Tools:** Python (Pandas), SQL Server, ETL Optimization, Data Visualization
- **Action:** Engineered an end-to-end ETL pipeline to ingest, cleanse, and normalize messy bank statements into a structured SQL Data Warehouse with automated transaction categorization.
- **Impact:** Reduced manual data processing by 90%, delivering a unified view of spending patterns that empowered advisors to optimize client budget allocations
